## Materials

- 14-count plastic canvas
- Yarn in your desired colors
- Yarn needle
- Scissors

## Instructions

1. Start by cutting a piece of plastic canvas to the desired size of your mouse pad. For a standard-sized mouse pad, you will need a piece of

canvas that is approximately 8 inches by 10 inches.

2. Once you have your piece of canvas cut, it's time to start stitching. You can use any stitch you like, but the most common stitch for plastic canvas is the half double crochet stitch. To do this stitch, simply insert your hook into the next hole on the canvas, yarn over, and pull up a loop. Yarn over again and pull through both loops on your hook. Repeat this process until you have reached the end of the row.
3. When you get to the end of the row, turn your work and stitch back in the opposite direction. Continue stitching in this way until you have reached the desired length of your mouse pad.
4. Once you have finished stitching, it's time to add a border to your mouse pad. This will help to keep the edges from fraying. To do this, simply stitch a single crochet stitch around the entire edge of the mouse pad.
5. When you have finished adding the border, your mouse pad is complete! You can now use it to protect your desk from scratches and spills.

## **Tips**

- If you are a beginner, it may be helpful to practice stitching on a small piece of plastic canvas before you start working on your mouse pad.
- You can use any color of yarn you like to make your mouse pad. However, if you are using dark-colored yarn, it may be difficult to see the stitches. In this case, you may want to use a lighter-colored yarn for the border.

- If you make a mistake, don't worry! Simply undo the last few stitches and try again.
- Once you have finished stitching your mouse pad, you can add any embellishments you like. For example, you could add beads, sequins, or even a ribbon.

The oops mouse pad plastic canvas pattern is a fun and easy way to add a personal touch to your workspace. This pattern is perfect for beginners, and it can be customized to match any décor. So what are you waiting for? Get started today!
