The origins of the Ranger Handbook can be traced back to the early days of the 20th century, when the U.S. Army recognized the need for a specialized force capable of conducting reconnaissance and combat operations in hostile environments. The first Ranger units were formed during World War II and played a crucial role in various campaigns throughout the conflict.

After the war, the Army continued to develop and refine the Ranger concept, and in 1956, the first edition of the Ranger Handbook was published. Since then, the handbook has undergone numerous revisions and updates, reflecting the evolving nature of warfare and the incorporation of new technologies and tactics.
